

# Clinical Judgment Mastery System — Product Content Outline

## Module 1: The NGN Decision Framework

**File:** ngn-framework.pdf **Pages:** 15-20

### Contents:

1. **Clinical Judgment Model Overview**
    - Recognize Cues → Analyze → Prioritize → Take Action → Evaluate
    - How this maps to NGN case studies
    - The “experienced nurse” thinking pattern
  2. **Recognize Cues: Signal vs. Noise**
    - Red flags that demand immediate action
    - Context-dependent interpretation (same number, different urgency)
    - Common cue categories: vital signs, lab values, patient behavior, history
  3. **Analyze: The Questions I Ask Myself**
    - What’s the underlying problem?
    - What could go wrong next?
    - What do I need to know that I don’t know?
  4. **Prioritize: Beyond ABC**
    - The ER nurse’s prioritization matrix
    - When ABC isn’t enough (multiple ABC issues)
    - Delegation rules and resource management
  5. **Take Action: Intervention Hierarchy**
    - Least invasive first principle
    - When to call the doctor vs. handle it yourself
    - Documentation that protects your license
  6. **Evaluate: The Forgotten Step**
    - Did the intervention work?
    - What changed? What didn’t?
    - When to escalate
- 

## Module 2: Prioritization Decision Trees

**File:** prioritization-trees.pdf **Pages:** 12-15

### Contents:

1. **The “Who Do You See First?” Tree**
  - 5 patient scenarios with walkthroughs
  - Decision points and rationale
  - Common traps students fall into
2. **Delegation Decision Framework**
  - What can be delegated to UAP/LPN?
  - What must the RN do?
  - Supervision requirements

3. **Resource Scarcity Scenarios**
    - One nurse, multiple urgent patients
    - Equipment failures during emergencies
    - When to call for help (and who)
- 

## Module 3: Real Case Walkthroughs

**File:** case-walkthroughs.pdf + video files **Pages:** 20-25

### Contents:

1. **ER Case: Chest Pain Rule-Out MI**
    - Patient presentation
    - My thought process (step-by-step)
    - What I did and why
    - What I almost missed
  2. **Oncology Case: Neutropenic Fever**
    - Why this is an emergency
    - Isolation protocols
    - Communication with oncologist
  3. **Med-Surg Case: Post-Op Complications**
    - Identifying decompensation early
    - Pain management vs. masking symptoms
    - Family communication
  4. **New Grad Survival: First Code Blue**
    - What to expect
    - Your role (even if you're not running it)
    - Documentation during chaos
- 

## Module 4: Memory Tools & Cheat Sheets

**File:** cheat-sheets.pdf **Pages:** 10-12

### Contents:

1. **Lab Value Quick Reference**
    - Critical highs/lows by system
    - Trending vs. single values
    - When to panic vs. monitor
  2. **Medication Classifications**
    - Common drug classes by system
    - Side effects to watch for
    - Contraindications that matter
  3. **SBAR Templates**
    - Standard SBAR
    - Urgent SBAR (getting action fast)
    - SBAR for handoff
    - SBAR for family updates
  4. **Clinical Day Planner**
    - Printable worksheet
    - Hour-by-hour organization
    - Prioritization notes section
-

## **Video Scripts (5 videos, 5-10 min each)**

### **Video 1: NGN Format Deep Dive**

- How the new NCLEX is different
- What “clinical judgment” actually means
- Framework overview

### **Video 2: ER Case Walkthrough**

- Screen recording of decision tree
- Real-time thinking process
- Common mistakes

### **Video 3: Oncology Case Walkthrough**

- Neutropenic fever scenario
- Infection control
- Communication scripts

### **Video 4: Prioritization Masterclass**

- Multiple patient scenarios
- Live decision-making
- Delegation examples

### **Video 5: First-Year Survival**

- What school didn't teach you
- Building clinical intuition
- Self-care and burnout prevention
